

## Genetic Profile Test Results

**Horse:** Brasilia do Summerwind

**Owner:** Lynn Kelley

### Horse and Owner Information

<b>Horse</b>	Brasilia do Summerwind	<b>DOB</b>	2005-01-01
<b>Breed</b>	Mangalarga Marchador	<b>Age</b>	11 years, 10 months
<b>Color</b>	.....	<b>Sex</b>	Mare
<b>Discipline</b>	.....	<b>Height</b>	.....
<b>Registry</b>	.....	<b>Reg Number</b>	77
<b>Sire</b>	Armistico L.J.	<b>Dam</b>	Brisa Libertas
<b>Sire Reg &amp; No.</b>	015799-5	<b>Dam Reg &amp; No.</b>	056149-6
<b>Comments</b>	.....		
<b>Owner</b>	Lynn Kelley	<b>Address</b>	31613 N 136 St
<b>Phone</b>	.....	<b>City, State</b>	Scottsdale, AZ
<b>Email</b>	lynnkelley@me.com	<b>Postal Code</b>	85262

## Genetic Profile Test Results

**Horse:** Brasilia do Summerwind

**Owner:** Lynn Kelley

### Results Summary

**Coat Color:** Brasilia do Summerwind has no Red alleles and two Black, indicating her base coat color appears Black. One copy of the Dominant Agouti allele was also detected; invisible on a Red base, it pushes/restricts Black out to points; legs, ear tips, etc. appearing Bay. As a result of the allele count in each of the following, she has a minimum 100% chance of passing Black and 50% Dominant Agouti to any offspring.

**Allele Summary:** Aa, EE, nd1/nd2, CT (Mid-distance Type)

**Traits:** Brasilia do Summerwind has not tested positive for any recessive disease alleles on this panel. \*Her DNA was also tested on our discovery/validation platform for non-Dun Primitive Markings. Preliminary results indicate she is heterozygous for non-Dun Primitive Markings and may pass it to 50% of any offspring.

**Please note:** Your analysis is ongoing and may include some regions marked with an asterisk denoting the following.  
\* Discovery - This gene detection is in the early stages of discovery and will have varying reliability results.  
\*\* Inconclusive - Not a bad omen! Simply put, the gene of interest did not reveal itself (neither a positive nor a negative; no result, therefore unknown).

## Genetic Profile Test Results

**Horse:** Brasilia do Summerwind

**Owner:** Lynn Kelley

### Coat Color Results

#### Base

<b>Agouti</b>	+/-	<b>ASIP</b>	Aa - One dominant Agouti allele detected; restricts any Black base to appear Bay.	More about A
<b>Black/Red</b>	+/+	<b>MC1R</b>	EE - Two Black alleles detected and no Red.	More about E

#### Modifier

<b>Brindle/IP</b>	-/-	<b>IKBKG</b>	No Brindle/IP alleles detected.	More about IP
<b>Grey</b>	-/-	<b>STX17A</b>	No Grey alleles detected.	More about G

#### Dilution

<b>Champagne</b>	-/-	<b>SLC36A1</b>	No Champagne alleles detected.	More about CH
<b>Cream</b>	-/-	<b>SLC45A2</b>	No Cream alleles detected.	More about CR
<b>Dun</b>	-/-,-/-,+/-,+/-	<b>TBX3</b>	nd1/nd2 (non-dun with possible primitive markings). One non-dun1 allele and one non-dun2 allele detected. No Dun alleles detected.	More about Dun
<b>Pearl</b>	-/-	<b>SLC45A2</b>	No Pearl alleles detected.	More about prl
<b>Silver</b>	-/-	<b>PMEL17</b>	No Silver alleles detected.	More about Z

### Coat Color Results, continued

#### White Patterns Results

<b>Dominant White</b>	-/-	<b><i>KIT</i></b>	No Dominant White alleles detected (DW1-21).	<a href="#">More about DW</a>
<b>Frame Overo (LWO)</b>	-/-	<b><i>EDNRB</i></b>	No Frame Overo (LWO) alleles detected.	<a href="#">More about LWO</a>
<b>Leopard Complex Spotting (LP)</b>	-/-	<b><i>TRPM1</i></b>	No Leopard Complex Spotting (LP) alleles detected.	<a href="#">More about LP</a>
<b>Pattern 1 (LP modification)</b>	-/-	<b><i>RFWD3</i></b>	No Pattern 1 (LP modification) alleles detected.	<a href="#">More about PATN1</a>
<b>Splashed White (MITF)</b>	-/-,-/-	<b><i>MITF</i></b>	No Splashed White 1 nor Splashed White 3 alleles detected.	<a href="#">More about SW (MITF)</a>
<b>Splashed White (PAX3)</b>	-/-,-/-	<b><i>PAX3</i></b>	No Splashed White 2 nor Splashed White 4 alleles detected.	<a href="#">More about SW (PAX3)</a>
<b>Sabino 1</b>	-/-	<b><i>KIT</i></b>	No Sabino 1 alleles detected.	<a href="#">More about SB1</a>
<b>Tobiano</b>	-/-	<b><i>ECA3</i></b>	No Tobiano alleles detected.	<a href="#">More about TO</a>

## Health Genetics 1

### Immune System

<b>Foal Immunodeficiency Syndrome</b>	-/-	<b>SLC5A3</b>	No Foal Immunodeficiency Syndrome alleles detected.	<a href="#">More about fis</a>
<b>Severe Combined Immunodeficiency</b>	-/-	<b>DNAPK</b>	No Severe Combined Immunodeficiency alleles detected.	<a href="#">More about scid</a>
<b>West Nile*</b>	+/+	<b>OAS1</b>	WNVR*/WNVR* - High susceptibility to West Nile Virus.	<a href="#">More about WNVR*</a>

### Muscle Disorders

<b>Glycogen Branching Enzyme Deficiency</b>	-/-	<b>GBE1</b>	No Glycogen Branching Enzyme Deficiency alleles detected.	<a href="#">More about gbed</a>
<b>Hyperkalemic Periodic Paralysis</b>	-/-	<b>SCN4A</b>	No Hyperkalemic Periodic Paralysis alleles detected.	<a href="#">More about HYPP</a>
<b>Malignant Hyperthermia</b>	-/-	<b>RYR1</b>	No Malignant Hyperthermia alleles detected.	<a href="#">More about MH</a>
<b>Myotonia</b>	-/-	<b>CLCN4</b>	No Myotonia alleles detected.	<a href="#">More about myt</a>
<b>Polysaccharide Storage Myopathy (type 1)</b>	-/-	<b>GYS1</b>	No Polysaccharide Storage Myopathy (type 1) alleles detected.	<a href="#">More about PSSM1</a>

## Health Genetics 2

### Neurologic Disorders

Cerebellar Abiotrophy	-/-	<i>MUTYH</i>	No Cerebellar Abiotrophy alleles detected.	<a href="#">More about ca</a>
Lavender Foal Syndrome	-/-	<i>MYO5A</i>	No Lavender Foal Syndrome alleles detected.	<a href="#">More about lfs</a>

### Reproductive Disorders

Androgen Insensitivity	-/-	<i>AR</i>	No Androgen Insensitivity alleles detected.	<a href="#">More about as</a>
IAR - Subfertility*	-/-,+/-	<i>FKBP6</i>	One IAR Subfertility* allele detected; likely no effect.	<a href="#">More about iar*</a>

### Skin Disorders

Hereditary Equine Regional Dermal Asthenia	-/-	<i>PPIB</i>	No Hereditary Equine Regional Dermal Asthenia alleles detected.	<a href="#">More about herda</a>
Junctional Epidermolysa Bullosis (type 1)	-/-	<i>LAMC2</i>	No Junctional Epidermolysa Bullosis (type 1) alleles detected.	<a href="#">More about jeb1</a>
Junctional Epidermolysa Bullosis (type 2*)	-/-	<i>LAMA3</i>	No Junctional Epidermolysa Bullosis (type 2*) alleles detected.	<a href="#">More about jeb2*</a>
Warmblood Fragile Foal Syndrome	-/-	<i>PLOD1</i>	No Warmblood Fragile Foal Syndrome alleles detected.	<a href="#">More about WFFS</a>

## Genetic Profile Test Results

**Horse:** Brasilia do Summerwind

**Owner:** Lynn Kelley

### Other Genetics

#### Trait Genetics

<b>Lordosis*</b>	-/-,-/-,-/-,-/-	<b>ECA20</b>	No pattern of Lordosis* alleles detected.	<a href="#">More about L*</a>
<b>Curiosity/Vigilance*</b>	+/+	<b>DRD4</b>	Cur - GG - Two Curiosity alleles detected; likely more curious than vigilant.	<a href="#">More about Cur/Vig</a>
<b>Myostatin/Speed</b>	+/-	<b>MSTN</b>	CT (Mid-distance Type) - One Sprint and one Endurance allele detected; likely Mid-distance ability.	<a href="#">More about MSTN</a>
<b>Gait</b>	-/-	<b>DMRT3</b>	No Gait alleles detected.	<a href="#">More about Gaited</a>

# Genetic Profile Test Results

Horse: Brasilia do Summerwind

Owner: Lynn Kelley

## Inheritance Probabilities

### Coat Color

Coat Color Inheritance Probabilities: The bar graph above depicts the number of alleles for specific coat color phenotypes based upon your horse's genetic testing results. Completely filled red bar represents two such alleles (homozygous) and a half-filled yellow bar represents one such allele (heterozygous).

## Genetic Profile Test Results

Horse: Brasilia do Summerwind

Owner: Lynn Kelley

### Inheritance Probabilities

#### Lordosis

#### IAR Subfertility\*

Multi-allele Risk Charts: Each chart represents a trait, and each bar indicates a distinct risk or allele presence. These act in combination to produce the trait. A red bar indicates the horse carries 2 risk alleles at the site; a partly-yellow bar indicates 1 risk allele; and a fully-grey bar indicates 0 risk alleles. If all bars are red, then the horse carries two risk alleles at each risk site and is likely affected. If all bars contain yellow or red, but are not all red, then the horse is likely a carrier. Otherwise, the horse is not a likely a carrier of the tested trait.

### Defining Genetics & More Info

---

<b>Allele:</b>	One of two or more alternative forms of a gene that arise by mutation and are found at the same place on a chromosome.
<b>Alleles: Heterozygous vs. Homozygous?</b>	Allele calls are written in a way that denotes their origin and whether they are DOMINANT (uppercase) or recessive (lowercase). For example, at MC1R (also known as extension), Black is dominant and thus written as "E" whereas Red is recessive and thus denoted as "e". Therefore, an EE horse is homozygous for Black (and thus appears black), an ee horse is homozygous for Red (appears Red), and an Ee horse is heterozygous (shows the dominant allele, thus is Black).
<b>Gene:</b>	A unit of heredity that is transferred from a parent to offspring and is thought to determine some characteristic of the offspring.
<b>Genotype:</b>	The genetic constitution or make up of an individual organism.
<b>Heterozygous:</b>	A pair of genes which are different (not the same). One is typically dominant and one recessive.
<b>Homozygous:</b>	A pair of genes that are identical (of one type).
<b>Phenotype:</b>	The observable or visible characteristics of an individual resulting from their genotype or the interaction of their various genes and environment.
